EDUCATION

Guru Jambheshwar University of Science & Technology (GJUS&T) Hisar, India
Bachelor of Technology in Information Technology 2021–2025
Core Coursework: Operating Systems (OS), Database Management Systems (DBMS), Computer Networks (CN).
R.P.V.V, Lajpat Nagar-1, Delhi *Class 12th (90.4%)*
Subjects: Physics, Chemistry, Mathematics, Computer Science, and English.
R.P.V.V, Lajpat Nagar-1, Delhi *Class 10th (91.6%)*
Subjects: Maths, Science, Social-Science, English, and Hindi.

TECHNICAL SKILLS

- **Cloud & Platforms:** Amazon Web Services (VPC, EC2, IAM, Route53, S3, Lambda, DynamoDB, API Gateway, SNS, CLI), Linux/Ubuntu Internals.
- **Containerization & Orchestration:** Kubernetes (Cluster Architecture, Pod Networking, Service Discovery), Docker, Docker Compose.
- **Automation & CI/CD:** Jenkins (Pipelines-as-Code), ArgoCD GitOps, GitHub Actions, Terraform (IaC), Ansible, Git.
- **Languages & Databases:** Python, Java, Advanced Bash/Shell Scripting.
- **Observability & Systems:** Prometheus, Grafana, Distributed Systems Logic, Uptime Metrics, Dynamic Port Mapping.

PROJECTS

- Automated Serverless AWS Infrastructure Monitor** *AWS, Python, Bash, GitHub Actions, Vercel*
- Built an automated, zero-cost monitoring tool to track AWS resource usage across EC2, S3, Lambda, and IAM.
 - Used GitHub Actions to run Bash and AWS CLI scripts every 15 minutes to collect infrastructure data.
 - Created a Python AWS Lambda function and API Gateway to store the collected data in DynamoDB for long-term audit.
 - Set up Amazon SNS to send automatic email alerts if server usage exceeds safety limits, proactively preventing billing spikes.
- Highly Available Web Infrastructure & Cloud Governance Framework** *AWS VPC, ASG, ALB, Bash*
- Designed a secure AWS virtual network (VPC) across multiple Availability Zones, separating public and private traffic.
 - Managed website traffic using an Application Load Balancer and Route53, with Auto Scaling to handle demand.
 - Wrote Bash scripts to automatically monitor cloud resources and report unused or dangling instances to optimize costs.
 - Configured a Bastion Host with strict IAM policies to ensure secure, auditable administration of private backend servers.
- Automated GitOps Engine & CI/CD Release Pipeline** *AWS, Docker, Kubernetes, Jenkins, ArgoCD*
- Created an automated CI/CD pipeline using Jenkins to compile code, run tests, and perform automated quality checks.
 - Implemented GitOps using Kubernetes and ArgoCD to maintain infrastructure state, ensuring deployments are safe and consistent.
- Multi-Container Platform Isolation & Microservices Network** *Docker, Kubernetes, Terraform*
- Packaged applications into lightweight Docker containers using multi-stage builds to optimize image size and startup times.
 - Built a secure Kubernetes networking layer that allows internal microservices to communicate privately while blocking unauthorized external access.

LEADERSHIP & VOLUNTEER EXPERIENCE

- Speakathon Club, GJUS&T** | *Club Coordinator* July 2023 – July 2024
- Led a cross-functional team to organize communication bootcamps, technical presentations, and mock interviews.
 - Boosted placement readiness and professional confidence for over 200 engineering candidates through systematic workshops.

LICENSES, CERTIFICATIONS, LANGUAGES & HOBBIES

Certifications: *Claude 101*, Anthropic (Issued Jul 2026 | ID: wz6ymakevino)
Languages: English (Professional Fluency), Hindi (Native Fluency)
Hobbies: Playing Chess, Reading Fiction and Non-Fiction Novels.
